MOHAMMAD GAYASUDDIN

DevOps Engineer | SRE | Cloud Engineer

+919525214774 | mohammadgayasuddin2003@gmail.com | Bengaluru

https://linkedin.com/in/ghiyas | https://github.com/Mohammad-Ghiyasuddin

SUMMARY

DevOps Engineer with 2 year 1 months of hands-on experience (including a 5-month internship converted to full-time) designing CI/CD pipelines, managing multi-cloud infrastructure (AWS, GCP), and implementing monitoring and observability solutions. Skilled in containerization (Docker, Kubernetes), IaC, deployment automation, cost optimization, and database/workload migration across cloud platforms. Proven track record of improving system uptime, reducing operational costs, and streamlining release workflows in scalable, secure and highly available production environments across multi-cloud infrastructure

SKILLS

- **Cloud Platform**: AWS (IAM, EC2, VPC, S3, EBS, Route 53), GCP (Cloud Run, VM, App Engine, Load Balancer, Bucket, MIG)
- **Databases & Systems**: MySQL, MongoDB Atlas, Pinecone, Linux (Ubuntu), nginx, Reverse proxy
- **Containerization & Orchestration**: Docker, Kubernetes, GKE, Docker Compose
- **CI/CD & Automation**: Cloud Build, AWS CodePipeline, Jenkins, Git, GitHub, YAML, OpenAI Codex, Artifact Registry, Terraform
- **Monitoring & Observability**: Prometheus, Grafana, CloudWatch, Cloud Monitoring, Cloud logging, ELK
- **Cost Optimization & Compliance:** Right-sizing, Cost Explorer analytics, Budget alert, Jira, Sprinto

EXPERIENCE

DevOps Engineer | Bengaluru

Kommunicate.io **Oct 2024 – Present**

• Designed and maintained CI/CD pipelines to automate build, test, and deployment workflows across cloud-native environment.
• Optimized cloud infrastructure by migrating services from AWS to GCP, improving performance, scalability and resilience.
• Monitored infrastructure health using CloudWatch and Cloud Monitoring, maintaining 99.5% application uptime consistently.
• Collaborated with cross-functional teams to troubleshoot production issues and improve overall platform reliability.
• Achieved 30% reduction in overall operational costs while significantly improving system availability and scalability.
• Improved compliance management by overseeing Sprinto tasks, automating security controls for ISO 27001, SOC 2, GDPR, and HIPAA readiness, and enhancing project tracking and team productivity by 10%

PROJECTS

Secure Deployment and Automation of a 3-Tier Application

- Automated the deployment process, cutting manual intervention by 80% through CI/CD pipelines using Codepipeline.
- Containerized 3-tier application with Docker, achieving consistent environments and reducing deployment issues by 90%.
- Orchestrated multi-container applications with Docker-Compose, boosting deployment speed and release consistency by 50%.
- Provisioned and managed infrastructure as a code (IaC) using Terraform, shrinking environment setup time by 70%.
- Technologies Used: AWS EC2, Docker, Docker-Compose, codepipeline, Terraform, Git, Linux, code build, GitHub.

Cloud Workload Migration | AWS, GCP

- Migrated diverse cloud workloads including VM, databases, storage, and serverless services from AWS to Google Cloud Platform ensuring minimal downtime and seamless service continuity and improved resource utilization.
- Applied lift-and-shift migration strategy, enabling real-time workload mobility across cloud platforms while significantly enhancing infrastructure scalability and lowering overall operational costs across multi-cloud environments.

Real-Time Monitoring | Grafana, Prometheus

- Implemented a Prometheus monitoring system for continuous health checks and automated downtime alerts.
- Utilized Blackbox Exporter for external service monitoring and Node Exporter for in-depth hardware and OS metrics, providing comprehensive visibility into application and infrastructure performance
- Configured Prometheus Alert manager for efficient alerts and issued email notifications, enhancing reliability

EDUCATION

Bachelor of Technology in CSE (CGPA: 7.5/10) **Aug 2024**

State Government, Motihari College of Engineering, East Champaran

CERTIFICATIONS

- Azure Fundamentals Certified (AZ 900) – Microsoft
- Oracle Cloud Infrastructure Certified Architect Associate – Oracle
